

# Product Spotlight

## IPG ET Xtreme® (ETX) Tape Head

Delaware Valley  
Packaging Group

## Overview

The IPG ET Xtreme® tape head is a high-performance carton sealing solution engineered to deliver maximum adhesion on today's recycled corrugated cases. It combines advanced mechanical design with optimized tape application to ensure secure, consistent case closure and reduce the risk of product damage or theft.

 **DVPG - IPG ET Xtreme®**

## Key Benefits

- **Maximum Case Seal Integrity** - Drives adhesive deep into corrugate for stronger, more secure closures.
- **Reduced Tape Waste** - Uses full tape rolls to the core without breaking or leftover partial rolls.
- **Consistent Performance** - Maintains tension and prevents tape stretching for reliable sealing every time.
- **Lower Downtime** - Eliminates common tape failures, improving uptime and line efficiency.
- **Easy Handling & Operation** - Lightweight design and simple threading improve usability and operator efficiency.

## Key Features

- **Free-Spinning Mandrel Design** - Maintains consistent tape tension and prevents film stretching as rolls deplete.
- **Patented Dual Wipe-Down System** - Drives adhesive deep into corrugate for a secure, reliable case seal.
- **Magnetic Blade Guard with Oiler Pad** - Enhances safety while ensuring clean, consistent tape cuts.
- **Lightweight Aluminum Construction** - Up to 50% lighter for easier handling with durable, corrosion-resistant performance.
- **Quick Threading & Easy Operation** - Built-in threading diagram and simple design allow fast, efficient tape loading.

## Ideal Applications

- **E-Commerce & Fulfillment** - High-volume shipping environments requiring strong, tamper-resistant case sealing to protect goods in transit.
- **Food Processing & Packaging** - Securely seals corrugated cases in fast-paced, washdown-ready production lines.
- **General Manufacturing** - Reliable carton sealing for a wide range of packaged goods across diverse production operations.
- **Distribution & Logistics** - Ensures consistent, durable seals for palletized shipments and warehouse handling.
- **Consumer Goods Packaging** - Ideal for sealing recycled corrugated cases while maintaining package integrity and brand protection.

## Proven Results

- **Stronger Case Seals** - Delivers consistent, secure closures that reduce product damage and returns.
- **Reduced Tape Waste** - Uses tape rolls to the core, minimizing leftover material and lowering costs.
- **Reliable Performance** - Maintains consistent tension to prevent tape breakage and sealing issues.
- **Improved Uptime** - Reduces tape-related stoppages, keeping lines running smoothly.
- **Greater Efficiency** - Simplifies operation and changeovers to support faster, more productive packaging lines.
