

Product Spotlight

Orion Flex Legion Stretch Wrap System

Delaware Valley
Packaging Group

Overview

The Orion Flex Legion Stretch Wrap System is a high-performance semi-automatic wrapper engineered to deliver consistent, secure load containment in demanding production environments engineered and made in the USA. It combines advanced film delivery technology with durable industrial construction and intuitive controls to ensure reliable, efficient operation across a wide range of applications, and lowers total operating costs.

Key Benefits

- **Improved Load Stability** - Delivers consistent, secure load containment to reduce shifting, damage, and returns.
- **Reduced Film Costs** - Advanced pre-stretch technology maximizes film yield and minimizes material usage.
- **Increased Throughput** - Scales easily from low to higher production volumes without outgrowing the machine.
- **Enhanced Operator Efficiency** - Intuitive controls and simple adjustments streamline operation and reduce training time.
- **Long-Term Durability** - Heavy-duty steel construction ensures reliable performance with reduced maintenance needs.

Key Features

- **200% Powered Pre-Stretch System** - Maximizes film efficiency while maintaining strong, consistent load containment.
- **RevoLogic™ Technology** - Ensures precise film application for optimal load stability and reduced film waste.
- **Heavy-Duty Steel Construction** - Rigid structural base and full steel tower deliver long-term durability and reliability.
- **Quick-Adjust Manual Controls** - Easy-to-use dials allow on-the-fly adjustments for speed, tension, and wrap settings.
- **High Load Capacity & Flexibility** - Handles loads up to 4,000 lbs with multiple loading options (forklift, pallet jack, or walkie).

ORION®

DVPG - Orion Flex Legion

Ideal Applications

- **Food & Beverage** - Secures pallet loads of packaged foods, bakery goods, and beverages while maintaining product stability during transport.
- **Consumer Goods** - Ensures retail-ready loads arrive intact by providing consistent load containment and protection.
- **Industrial & Manufacturing** - Stabilizes heavy or irregular pallet loads to prevent shifting, damage, and safety risks.
- **Pharmaceutical & Healthcare** - Delivers secure, compliant pallet wrapping for sensitive and regulated products.
- **Distribution & Logistics** - Ideal for high-volume pallet wrapping in warehouses and fulfillment centers to improve efficiency and load security.

Proven Results

- **Reduced Product Damage** - Improves load stability, cutting damage and returns by **10-30%**.
- **Lower Film Costs** - Optimized pre-stretch reduces film usage, saving **20-40% on material spend**.
- **Higher Throughput** - Increased wrapping speed and consistency boost productivity by **10-25%**.
- **Labor Savings** - Simplified operation and automation reduce manual effort, saving **1-2 hours per shift**.
- **Less Downtime** - Durable design and reliable performance decrease maintenance-related stoppages by **15-30%**.
